

Deepak Kumar Kaiwartya

AI-Assisted Freelance Web Developer

Chhattisgarh, India | kewatsoftware@gmail.com | 7889754337

FULL-STACK WEB • UI/UX • AI-ASSISTED DEVELOPMENT • LIVE DEPLOYMENT

PROFILE

Self-taught AI-assisted freelance web developer with hands-on experience building responsive web applications, full-stack projects, custom admin portals, database-backed features and live deployments. Uses AI-assisted workflows to rapidly turn concepts into functional digital products.

TECHNICAL STACK

Frontend

HTML5 • CSS3 • JavaScript • Tailwind CSS • Responsive UI/UX

Backend

Node.js • Express.js • REST API integration

Databases

MongoDB Atlas • Firebase Firestore

Authentication

Firebase Authentication • Admin authentication workflows

DEVELOPMENT TOOLS

AI

Gemini • ChatGPT • AI-assisted code generation • Prompt engineering

Code

Git • GitHub • VS Code • Spck Editor • Pydroid • Termux

Deployment

Render • Netlify • Vercel

CORE CAPABILITIES

- Responsive website and web-app development
- Custom dashboards and administrative portals
- Frontend ↔ backend API integration
- Firebase / MongoDB data integration
- Live deployment and hosting workflows
- AI-assisted rapid prototyping and debugging

EDUCATION

Completed 5th-grade education • 2013

INDEPENDENT PRACTICE

Self-taught freelance software developer and designer working with mobile-friendly development environments and cloud services.

SELECTED PROJECTS

Kewastore

E-Commerce Web Platform

Developed and deployed an e-commerce platform with interactive product categories, custom shopping-cart logic and checkout workflows. Hosted on Netlify.

Kewa Web Portfolio

Responsive Portfolio Web Application

Built a dark-themed responsive portfolio with custom CSS, modern UI components, AI-assistant interfaces, project showcases and live deployment workflows.

Kewa Admin Portal

Custom Management Dashboard

Engineered an administrative portal connected to backend routing, Firebase Firestore and Render services for project posts and lead management.

DEVELOPMENT WORKFLOW

01 Concept — Turn an idea or visual concept into a practical web-app structure.

02 Build — Create responsive frontend, backend routes, database connections and admin features.

03 AI-Assisted Iteration — Use Gemini and ChatGPT for implementation support, debugging and feature refinement.

04 Deploy — Connect GitHub and deploy frontend/backend services through cloud platforms.

05 Test & Improve — Check live behavior, fix issues and refine the user experience.

TECHNOLOGY HIGHLIGHTS

Web	HTML5, CSS3, JavaScript, Tailwind CSS
Server	Node.js, Express.js, REST APIs
Data	MongoDB Atlas, Firebase Firestore
Cloud	Render, Netlify, Vercel
AI	Gemini, ChatGPT
